

PE and Sports Premium Review

Introduction

The PE and Sports Premium funding has been used strategically this year to enhance the quality of physical education, promote physical activity, and improve sporting opportunities for all pupils. The school remains committed to using the funding to ensure sustainable impact, inclusivity, and high-quality provision across all year groups.

Improvement of Outdoor Play Spaces

A portion of the funding was allocated to the **resurfacing of the Reception playground areas**. This improvement has provided a safer and more engaging environment for our youngest pupils to participate in active play. The enhanced surface supports the development of gross motor skills, balance, and coordination, encouraging children to be physically active from an early age.

Swimming Provision

To ensure all pupils meet the national swimming requirements, **catch-up swimming sessions were provided for Year 4 pupils**. These sessions have supported children who required additional time to develop water confidence, swimming ability, and essential water safety skills. This targeted support contributes to improving overall swimming attainment across the cohort.

Investment in Sports Equipment

Funding was used to purchase **new sports equipment** to enhance the delivery of PE lessons and extracurricular activities. The new resources enable staff to deliver a broader and more engaging curriculum, ensuring pupils can participate in a wide range of sports and physical activities. This investment supports skill progression and sustained participation in physical education.

Support for School Sports Teams

To promote school representation and participation in competitive sport, the Sports Premium was also used to purchase **equipment and kit for school sports teams**. This has encouraged greater pupil involvement in inter-school and intra-school competitions, fostering teamwork, sportsmanship, and pride in representing the school.

Impact and Sustainability

The spending decisions have directly benefited all pupils by:

- Providing safer and higher-quality play and learning environments.
- Increasing participation and confidence in physical activity and swimming.
- Supporting inclusive access to sports for all pupils.
- Raising the profile of PE and sport across the school community.

The school continues to evaluate the impact of the Sports Premium to ensure it is used effectively and sustainably, improving outcomes in physical education and promoting lifelong health and wellbeing.
